“Leaning Forward”
On Alternative Fuels

Biofuels for Aviation Summit
September 1, 2009

Mr. Patrick Dulin
Executive Director, Defense Energy Support Center
Energy Industry is Changing

“...So we have a choice to make. We can remain one of the world's leading importers of foreign oil, or we can make the investments that would allow us to become the world's leading exporter of alternative and renewable energy.”

President Obama, March 19, 2009

- Creation of millions of “green” jobs
- Significantly reducing reliance on foreign oil
- Investing in new AF/RE technology
- Cap-and-trade program to reduce green-house gas emissions
“We are also looking to improve energy security by institutionalizing energy considerations in our business processes, establishing energy efficiency and sustainability metrics, and increasing the availability of alternative sources.”

Navy Adm. Mike Mullen, Chairman of the Joint Chiefs of Staff
May 2009
